Initial Startup Process

1. Pre-start Check

- Open the fuel tank cap and confirm there is enough fuel.
- Ensure the engine oil is within the specified range, and the battery is properly connected and sufficiently charged.

2. Turn on the Power and Adjust Cold Start Settings

Insert the ignition key and turn it to the "ON" position. For a cold start, be sure to set the choke to the "ON" position to improve fuel vaporization at low temperatures and help the engine start smoothly.

3. Engine Ignition

There are two ways to start: use the electric start button for an easy start, or use the kick starter if the battery is low. Regardless of which method you choose, ensure the engine runs smoothly after starting.

4. Warm-up and Disengage Cold Start

After the engine starts, let it idle to warm up for 30–60 seconds. As the engine temperature rises, gradually return the choke to the "OFF" position to ensure smooth engine operation and avoid excessive fuel consumption.

Frequently Asked Questions

1. Electric Start Does Not Work

Ensure the battery is fully charged and the connections are normal. If the battery power is low, try using the kick starter. If it still fails to start, check whether the start button is functioning properly.

2. Low Engine Power or Difficulty Accelerating

Check that the fuel tank has enough fuel and that the fuel line is not blocked. Confirm that the fuel pump and filter are functioning correctly, and clean or replace them if necessary.

3. Vibration and Loose Parts

After prolonged riding, loose parts can lead to increased vibration. Regularly inspect and tighten the screws on all parts of the vehicle, especially the transmission and suspension systems. Check the chain tension, keep the chain properly tightened, and lubricate it regularly to reduce vibration.

Initial Startup Process

1. Engine Oil Maintenance

Engine oil plays a critical role in lubrication and heat dissipation. It is recommended to change the oil for the first time after the break-in period, and subsequently every 20–30 hours or each riding season (whichever comes first). If frequently used in high-temperature, muddy, or high-load environments, the oil change interval should be shortened accordingly. Generally, 10W40 synthetic oil is recommended; 15W40 may be used in summer, while 10W30 is more suitable for winter. When changing the oil, check the oil level with the dipstick to ensure it is within the specified range, and add oil to the recommended level — avoid overfilling or underfilling.

2. Battery Maintenance

Ensure the battery connections are secure and the battery is properly charged. When not riding for an extended period, remove the battery and store it in a dry environment to prevent excessive discharge. It is recommended to check the battery's charge and health once a year, and replace the battery if necessary.

Recommendations	Not Recommended
Change the engine oil regularly — every 20 riding hours or every 3 months.	Using engine oil that does not meet the manufacturer's specifications may affect engine performance.
Clean the air filter regularly — every 100 riding hours or after each long trip.	Failing to clean the air filter for a long time may restrict engine intake airflow.
Check the battery charge, and remove the battery for storage when the vehicle is not ridden for an extended period.	Allowing the battery to become deeply discharged or exposing it to moisture may cause battery damage.

Note: For more detailed maintenance instructions, please refer to the user manual.

Product Registration and Usage Feedback

Register Your X-PRO Vehicle

Please register your X-PRO vehicle to enable us to provide faster and more accurate service support. Registration allows us to:

- More precisely identify your vehicle and component compatibility
- Offer more efficient assistance when needed
- Archive your ownership information

Please scan the QR code below to register your product.

Share Your Story

You' re also welcome to follow us on Instagram, TikTok, YouTube, and Facebook to explore authentic stories and moments from the X-PRO community. We look forward to seeing you share a photo or short video capturing joyful times with your family and your X-PRO. Every genuine moment tells a true X-PRO story.
